

Food and Beverage

Reduce your filtration costs by up to 20%

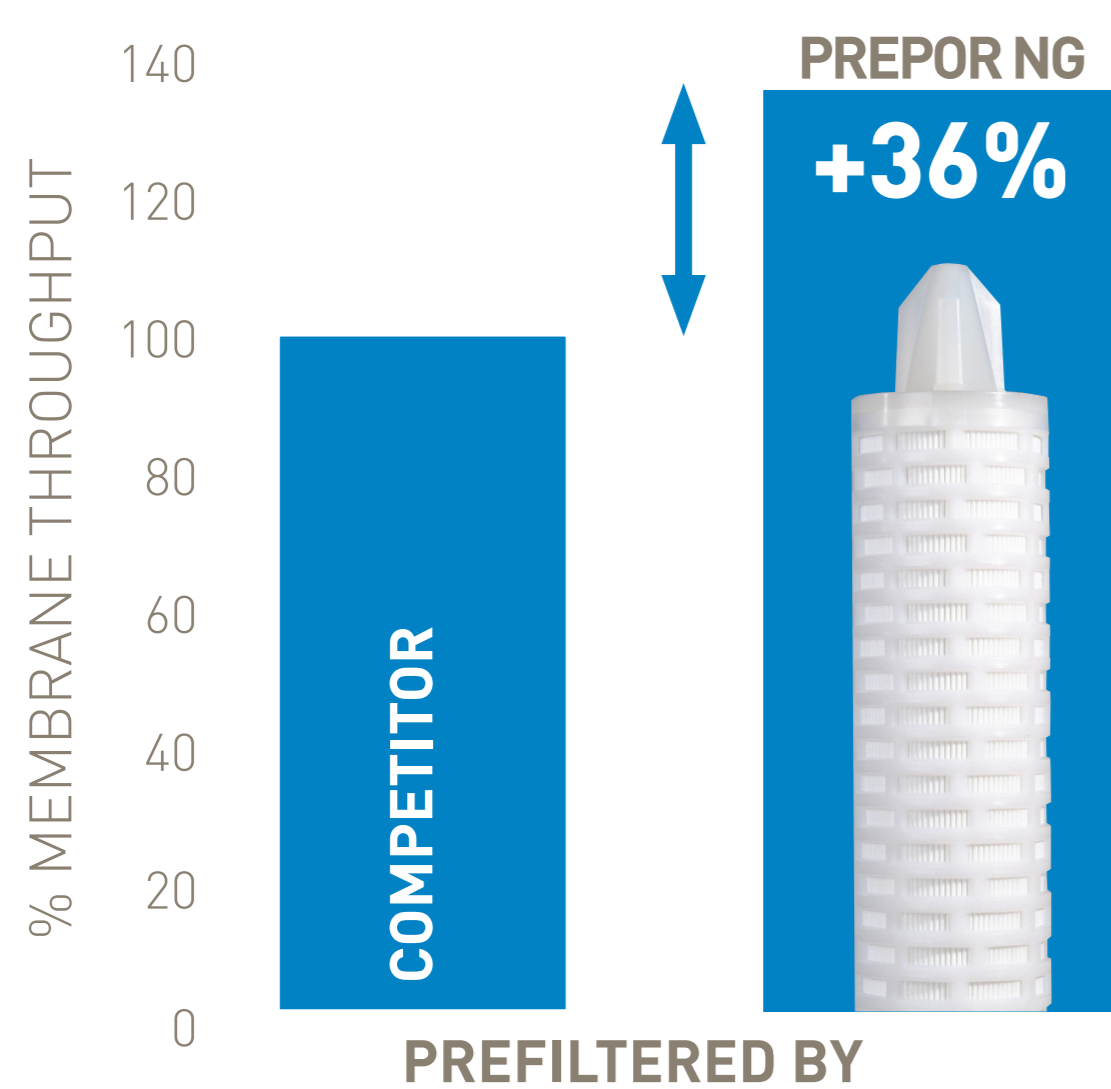

PREPOR NG

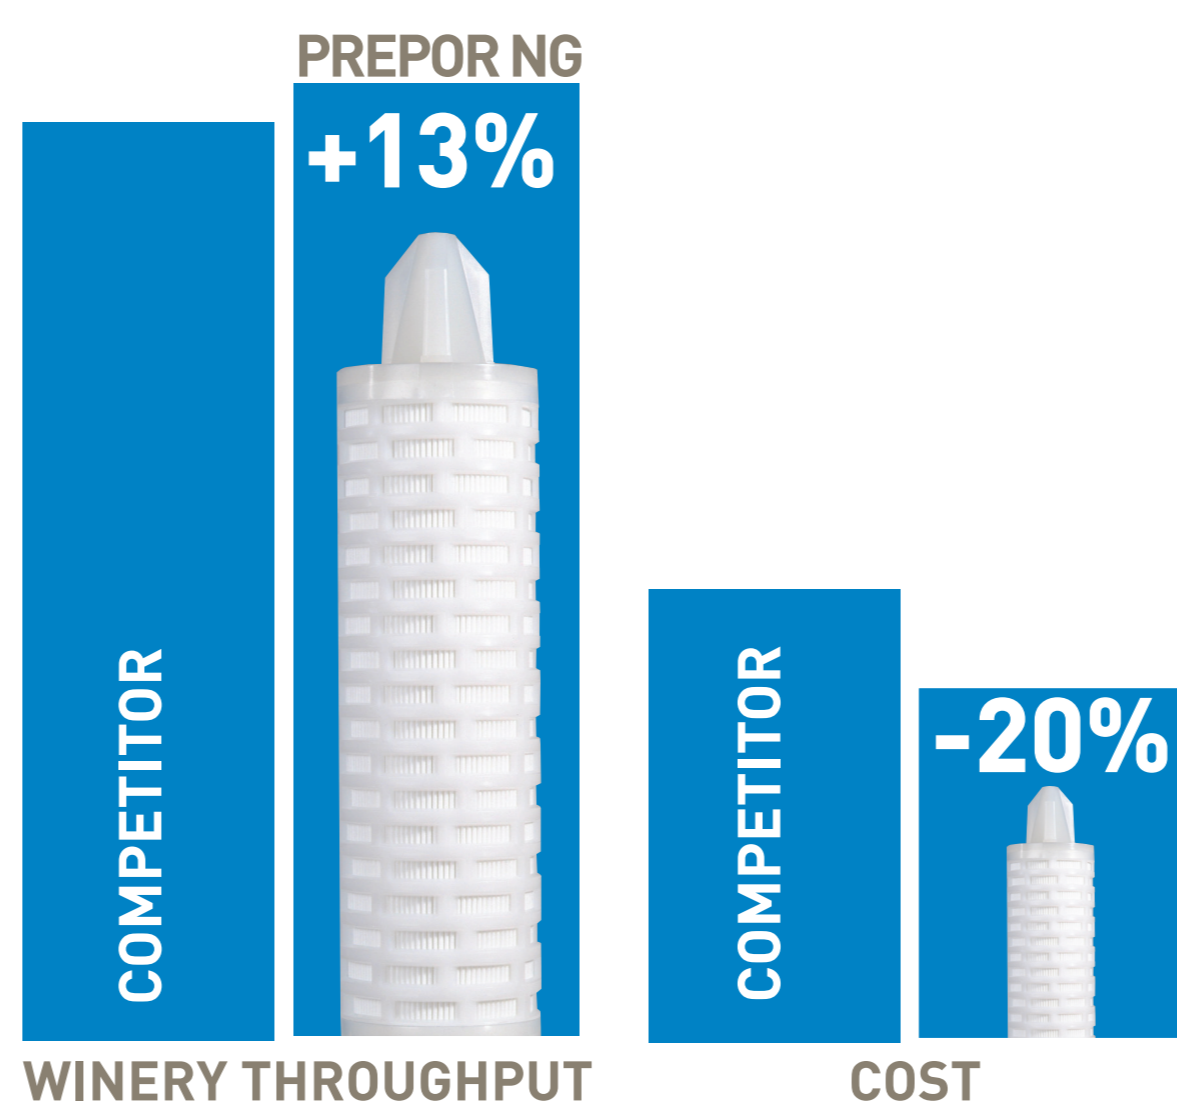

The next generation prefilter

Parker domnick hunter's new advanced PREPOR NG prefilters offer superior levels of membrane filter protection and reduced running costs for pre-stabilization applications. Unique optimized depth construction technology and robust media underpin the superior performance.

Membrane filter protection

12 month BETA trial

Optimized Depth Construction (ODC) provides a unique graded density combining longer service life with absolute filtration efficiency.

High depth products

Relatively low effective filtration area but high depth

PREPOR NG

Combines both features

High effective filtration area

High depth

Optimized construction
