

# Change Notification

Vent autoclave filter sock removal

Change reference: MCR-654

Rev: 1

## Products affected

The vent autoclave format used in the HIGH FLOW BIO-X and HIGH FLOW TETPOR II ranges of sterile gas filters.

This change supersedes change reference MCR-420.

This change affects the complete range of vent autoclave style cartridges supplied by Parker Bioscience Filtration, including the standard ranges and customer specific OEM branded products. This change brings this range of products in-line with the rest of the DEMI product family.

Please see table below for details:

| <b>PRODUCT CODE PREFIX</b> | <b>PRODUCT RANGE</b> |
|----------------------------|----------------------|
| ZGPx                       | HIGHFLOW BIO-X       |
| ZTAx                       | HIGHFLOW TETPOR II   |
| CFVFYA                     | OEM BRANDED          |
| ZCGFA-2.0V-/E6             | OEM BRANDED          |

The change will be implemented by the 31<sup>st</sup> Dec 2018.

If you have any further queries about this change or if you require participation in your change control, please contact your local Parker Bioscience Filtration representative or e-mail: [bioscience.emea@parker.com](mailto:bioscience.emea@parker.com).

For and on behalf of Parker Bioscience Filtration.
